

SUMMARY

McGoodwin, Williams and Yates, Inc. has been involved in the planning and development of public works projects since 1946, when L. M. McGoodwin began his practice of consulting engineering. Since then, MWY has specialized in serving municipalities and other public entities.

Our firm has maintained a stable financial presence in the Northwest Arkansas area for over 60 years and has an outstanding reputation within the state's engineering community. Staff members are well educated and highly trained, many of whom have been associated with the firm for decades.

Our Statement of Qualifications highlights a number of projects we believe to be relevant to the needs of the city of Fayetteville, specifically local projects which in some instances have direct impact on the region's growth.

SPECIALIZED SERVICES

We focus our practice on providing design professional services needed by municipalities and other governmental entities. The types of services we offer are:

- Architecture
- Bridges
- Computer Modeling
- Construction Management
- Drainage Facilities
- General Civil Engineering
- Mapping
- Master Planning
- Rate Studies
- Streets and Roads
- Surveying
- Wastewater Systems – All Aspects
- Water Systems – All Aspects

SERVICE APPROACH

MWY provides services to a client from conception to occupancy of a project. Our firm has a staff of skillful, versatile professionals who are committed to a team approach on all assignments. We are committed to providing services that reach beyond the normal engineering and architectural services. The specific approach to any given project is always dictated by the nature of the project, thus our approach is to work with each client to:

- Determine the specific problem to be solved
- Establish a project scope
- Determine the qualifications and experience of personnel needed to complete the assignment
- Develop a project schedule
- Develop an engineering services agreement
- Implement and complete the project

PERSONNEL

MWY maintains a staff of approximately 40 employees. Among the highly trained personnel are seven engineers and two architects, with the remainder being draftsmen, engineer interns, engineering technicians, surveyors, and construction inspectors. Also included are those in other areas of expertise such as computer technicians, finance and economics personnel, project administrators, and the support staff. The MWY staff is committed to a team approach on all assignments, and strives to provide services that reach beyond the normal engineering and architectural services.

Many of MWY's employees have been associated with the firm for decades, resulting in a solid team with extensive knowledge of local, state and federal rules, regulations and construction issues.

The executive management team of the firm and the year each person joined the company is shown below:

L. Carl Yates, P.E.
Chief Executive Officer
Chairman of the Board
(1958)
